MSB FORM

MSB FORM

THE FUTURE OF FORMWORK

MSB Form is an adjustable formwork solution for the concrete construction industry, designed to be compact, lightweight, and strong for all conditions and applications - commercial, industrial, residential and civil. You can expect maximum results throughout the slab process, whether you're using MSB Form for slab on grade, fixing down to concrete or plywood.

If you want to get the job done faster, safer and greener, ensuring a superior finished result -upgrade to MSB Form.

Don't get left behind.

Say goodbye to lumber kickers, walers and nails.

The future is here.

FASTER STRONGER SAFER GREENER

WHY SWITCH TO MSB FORM?

EASY TO USE

An all-in-one kicker & brace solution for concrete formwork. Each frame is easily packed, transported and set up fast, simplifying the process from start to finish.

SAVE TIME & MONEY

Set up your slab in a third of the time, in turn reducing labour costs. It's fast and efficient giving your business the capacity to complete more projects.

VERSATILITY

Available in different sizes and with adjustable lengths, your MSB Form set can be used on jobs of any scale. No matter the requirements - one set fits all.

SAFETY

MSB Form is high-vis orange for increased visibility, uniform in their size and shape, all of which combines to reduce trip hazards. Frames and rods are lightweight and ergonomic, causing less strain on your body during the set up and strip down process.

SUSTAINABILITY

MSB Form can last 10+ years with the right care. Each frame is made using the highest quality steel, then zinc-plated and powder coated, eliminating consumables by minimising wastage (eg. ply and lumber kickers, nails and walers). Less energy to set up and strip down means less wear and tear on your team.

MAXIMISE QUALITY

Deliver a high quality product & results. Minimise rectifications, blowouts, honeycombing and dimensional errors. Drastically improve your Finished Floor Level & maintain a professional work site. Set up your MSB Form & walk away with the peace of mind of knowing you'll be able to deliver a quality slab every time.

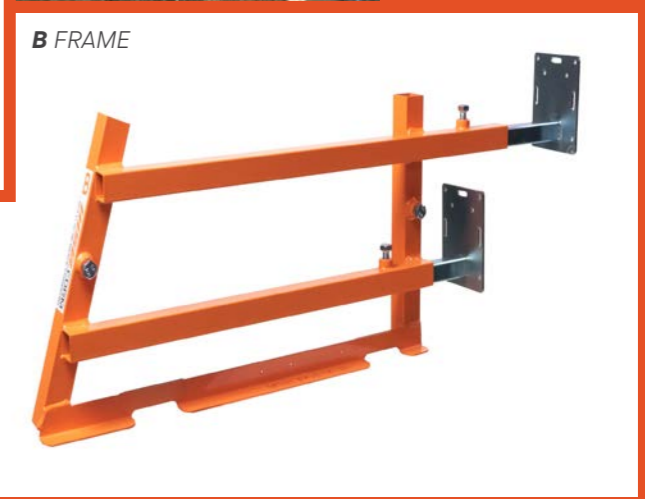

A, B, C FRAMES

Ideal for conventional and monolithic slabs, 310mm and 385mm waffle, 150mm -500mm slab on grade
Frames connect and stack up to 1.2 metres tall
Can be fixed to concrete, plywood and ground

A FRAME

B FRAME

C FRAME

PERFECT FOR

- Brick ledge
- Curbs
- Slab-on-deck
- Slab-on-grade
- Monolithic slabs
- Paving
- Radius pours
- Tank pads
- Tilt-up slabs
